

Ouellette Park, Ottawa

*“Our Fibertop customers now have two great choices when it comes to their playground surfacing decisions.”*

*-Andy Crocket*

## INTRODUCING OUR NEW PLAYGROUND SURFACING PRODUCT

Playcare's Fiberweave is a new Cedar based engineered wood fibre playground safety surfacing product. The product has been IPEMA certified by TUV America who are contracted to complete and update all testing for IPEMA.

IPEMA certification means that a particular product conforms to ASTM F1292-09 (Fall Attenuation) and ASTM F2075 - 10a (Tramp Metals and Sizing Analysis). Testing, under IPEMA is on-going and updated yearly. Beyond the scope of IPEMA testing, Fiberweave is also tested for compliance with ASTM F1951-09b (Accessibility) which is typically required by most Ontario municipalities.

Fiberweave's natural wood look will enhance the aesthetic value of your play area. Fiberweave's natural Cedar fibre is knit together creating a soft yet durable surface like no other.
